## CPL LAB INTEGRATION

patient**NOW**

Practice with purpose.

# Integrated Connectivity and Communication Options Between You and Your Clinical Laboratory

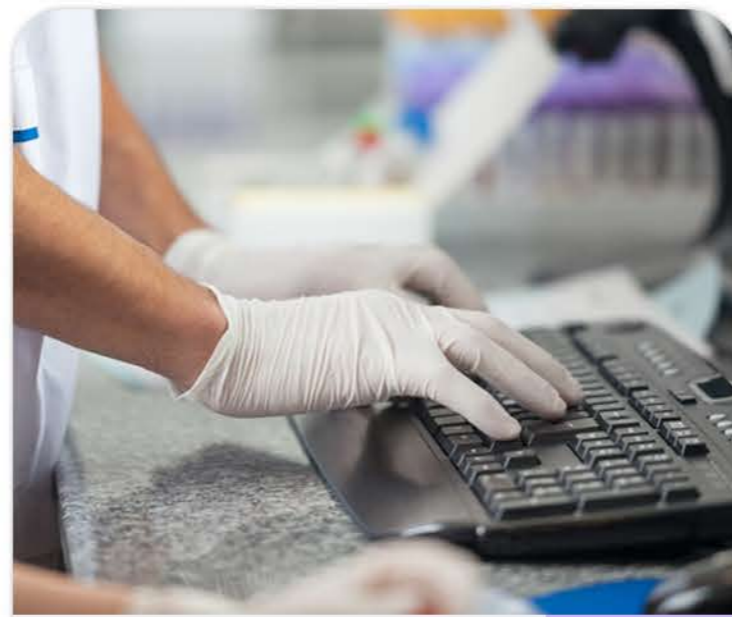

patientNOW's CPL lab integration offers practices who regularly send clinical specimens on a weekly basis enhanced electronic connectivity options to promote ease-of-use, accuracy, efficiency and turn around times. Expedite your laboratory test requisitions and results reporting through this newly developed lab interface

**Increase accuracy by 25%**

Reduce specimen delays or the need for lab re-draws with our bi-directional, cloud based lab interface. Improve accuracy through the use of consistent and automated requisitions to reduce human error and cut down the amount of calls required to clarify inconsistent or missing patient data.

**Increase staff efficiency by nearly 20%**

Increase staff efficiency by reducing the need for tedious manual entry. A suite of pre-printed tools and templates include the most frequently ordered tests, panels, and profiles, pre-populated practice information, patient data, ordering physician preferences, and even special request fields.

**Improve turn-around times by 30%**

Reduce the amount of time it takes to obtain lab results. No more waiting on couriers, faxes, or even e-mail. Results are automatically transferred into your patient chart the minute each test is reviewed and signed off by your lab team through our communication interface.

**Improve patient satisfaction by 50%**

Your patient's record is updated expeditiously and accurately. Cut down on the amount of time your patient anxiously awaits their lab results and allow them to move forward with treatment and/or care more rapidly.
