

SECURE

ELECTRONIC PRESCRIBING OF CONTROLLED SUBSTANCES (EPCS)

patientNOW

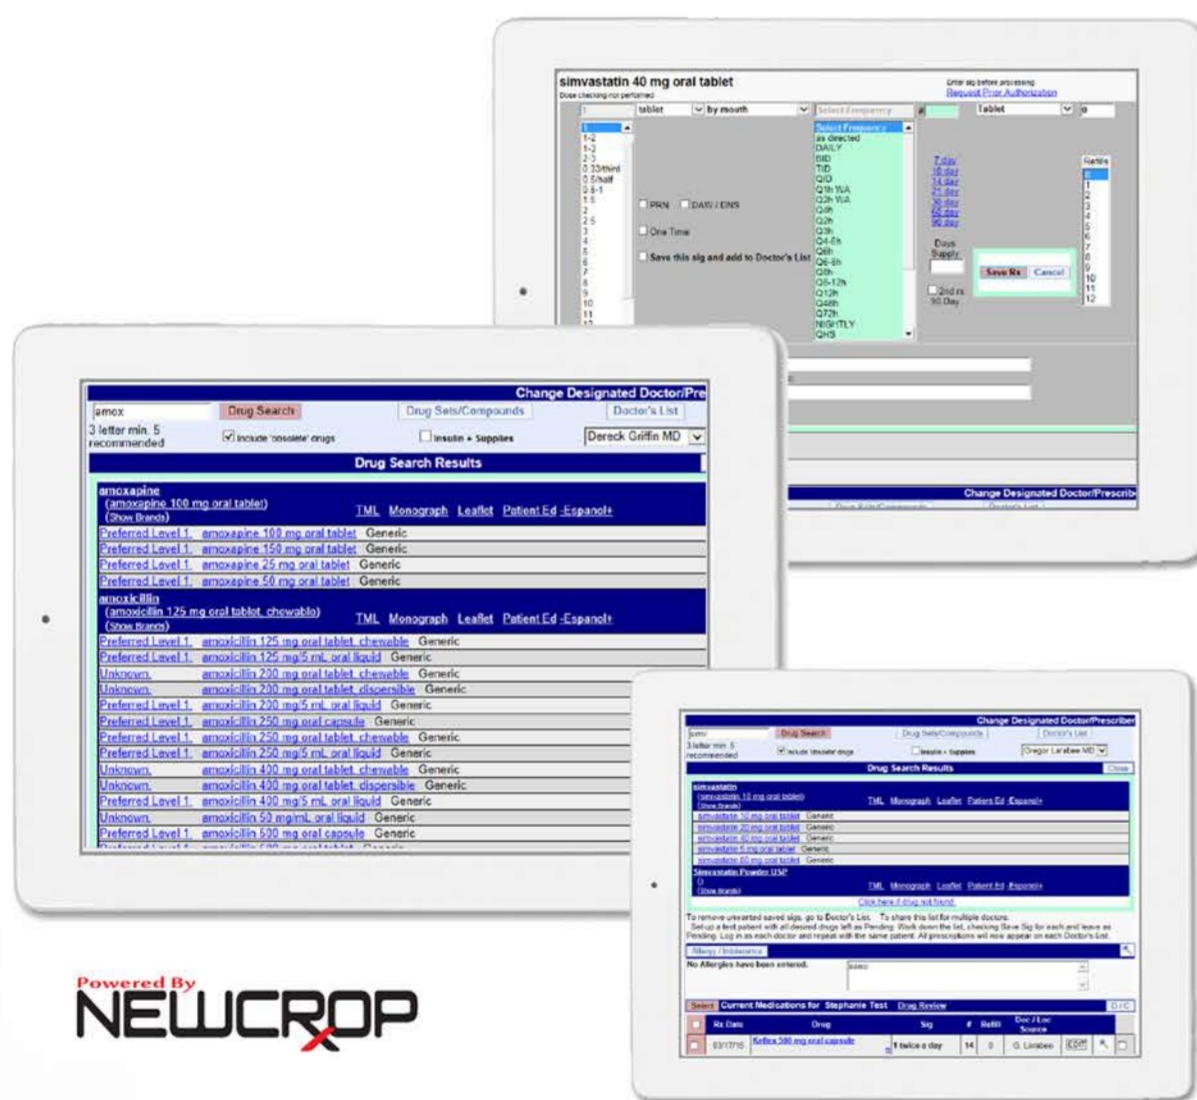

Practice with purpose.

Streamline & automate your prescription writing and tracking process with

RxNOW

No one makes it easier to comply, efficiently implement, and quickly take charge of EPCS than patientNOW's RxNOW. Our secure system for identity proofing and authenticating transactions is DEA compliant for your registered prescribers. From one simple interface, you can search and select medications, check drug interactions, write and transmit secure prescriptions, save records to medical charts, build medication histories, grow pharmacy lists, and print RX receipts.

PRACTICE BENEFITS:

- Easy to learn & use
- Streamlines process & saves time
- Quick, accurate records access
- Eliminates errors
- Highly secure & DEA compliant
- Provides drug interaction alerts
- Provides exceptional patient experience

PATIENT BENEFITS:

- No paper to track
- Saves personal time
- More convenient
- Safer & secure
- Eliminates errors
- Creates medication history
- Enhanced patient experience

"We've been using the patientNOW eprescribe feature for about four months now. It was super easy to learn and my practice is ahead of the curve since we've put the feature to use prior to it being mandated. By using this feature my practice is secure in the knowledge that our record-keeping for prescriptions is accurate and complies with DEA regulations."

DAVID L. ABRAMSON, MD | Private Practice
